

# MULTIGATE PrecisionPack®

## The next generation pack

The compact size, clear labeling, improved pack assembly and ingeniously designed components make the PrecisionPack® system the most advanced pack system on the market.

### FEATURES

## Improving performance with every step

Addressing clinician concerns over bulk and complexity we developed a packing system that ensures our PrecisionPack® custom procedure packs are compact, simple to use and easy to store.

Our innovation lies in three key areas:

47%

### Space Saving CubeWare®

Can reduce the bulk of packs by up to 47%, returning precious space to storeroom shelves. It also improves the shape and stability of packs so they can be stacked with more confidence.

### Front-Facing Colour Coded Label

Supports quick pack selection by making packs easier to locate on shelf and critical information easy to find.

Each surgical specialty is represented by a different colour for easy identification.

### Packing Methodology

Combines with CubeWare® to further improve the size, shape and stability of our packs and contributes to a more controlled un-pack during theatre setup, reducing the risk of items falling.

## Why Custom Pack?

Custom Procedure Packs offer a compelling set of benefits felt across clinical, inventory and wider hospital performance.

### Theatre productivity improvements

- ✓ Improved workflows which improve procedure times
- ✓ Reduced picking and setup times
- ✓ Improved aseptic practice
- ✓ Single use drives improved infection control
- ✓ Reductions in linen and associated lint
- ✓ Simplified surgeon preference management

### Wider hospital production improvements

- ✓ Reduced picking errors
- ✓ Reduced inventory holding costs of consumables
- ✓ Operating theatre space management
- ✓ Reduced CSSD costs
- ✓ Reduced procurement processing
- ✓ Less waste and less waste handling

## Why Partner with Multigate?

As a leading supplier of procedure packs and medical consumables in Australia, we understand that delivering an effective Custom Pack implementation requires a partnership.

Combining local production in our world class 1,600m<sup>2</sup> clean room at Villawood with a range of overseas joint ventures means we control the supply chain for the vast majority of the components that go into your PrecisionPack®.

Our systems and people are dedicated to working collaboratively with all stakeholders of your business to deliver a great experience.

As new products become available or requirements change, we will work with you to review and adjust your packs so they continue to deliver the best performance, environmental footprint and value possible.

## Experience Organised

We know how hard it can be to find the pack you are looking for even if it is placed in the correct location. PrecisionPack® can help bring order to your store room.

- ✓ Packs can be securely placed on their back or side
- ✓ Improved shape and stability allows packs to be stacked with more confidence
- ✓ Compact size and improved stacking allows you to fit more packs on the shelf
- ✓ Colour coded front label enables quick pack selection
- ✓ Each surgical specialty is represented by a different colour for easy identification
